

I would like to voice my concern over the NAB's petition 04-160. I am a XM radio subscriber and use the xm instant traffic and weather many times a day. I believe it is my right as a US citizen to recieve such benefits if i desire, especially when I am rightfully paying for this great benfit. If this is cut off by some governmental petition my trust in US policy making will drop yet again. Please reconsider and dismiss this as yet another large union stopping others from enjoying the many payed benfits we have in this great country of ours.
